

Plotseed XXL

Plotseeder for no-tillage application,
tractor mounted.

The Plotseed XXL was specially designed for minimum and no-till seeding of trial plots. A variety of distribution systems makes it possible to distribute the seed for a plot over multiple rows.

The particularly robust frame allows for the use of heavy no-till openers in combination with coulters and fertilizer openers, as well as combinations of multiple distribution systems. The modular system with its various options allows you to customize the planter for almost any application.

Your benefits summed up:

- Minimum and no-till seeding of plots even under difficult soil conditions through use of various opener systems as well as add-on weights
- Easy and safe operation thanks to a clear-cut layout
- Easy track width and row spacing adjustment
- Wide range of application, thanks to different feeding variants

Technical Data

Basic machine

Attachment options	3-point hydraulic system on tractor
Row numbers	2 - 12 rows
Row spacing	From 12.5 cm depending on opener type
Track width	1250 - 1900 mm, adjustable
Tires	7.60-15 Impl-R 8PR

Feeding of the seed distribution system

Belted cone	290 or 195 mm diameter
Cell wheel	264 or 401 mm diameter
Several seed distribution systems	<p>These combinations of seed distribution systems are available:</p> <ul style="list-style-type: none"> - 2 belted cones side by side - 2 belted cones in a row - 2 cell wheels in a row - 2 cell wheels side by side - cell wheel and belted cone in a row – for simultaneous sowing and spreading of fertilizer or micro granulate
Continuous drilling device	13 l Contents

Slope compensation

Fixed frame	No slope compensation
Slope compensation via 2 push buttons	Manual slope compensation
Slope compensation by sensors	Automatic slope compensation

Opener systems

Double disk opener	ACRA PLANT, GREAT PLAINS, LEMKEN and others upon request
